BARBOUR, PHILIP L; Editor.

The Jamestown Voyages Under the First Charter 1606-1609.

Documents relating to the foundation of Jamestown and the history of the Jamestown colony up to the departure of Captain John Smith, last president of the council in Virginia under the first charter, early in October, 1609.

First Edition; Two Volumes; Demy 8vo; Vol. I. pp. xxviii, 248; frontispiece, 1 illustration, 3 maps one folding; Vol. II. pp. viii, 249-524; 3 maps one folding, appendices, bibliography, index; both volumes in original blue cloth, title lettered on spines in gilt, gilt decoration on front board of each volume, dustjackets, fine set. Cambridge; Hakluyt Society; 1969. (Second Series Numbers CXXXVI & CXXXVII).

In December 1606, one hundred and twenty emigrants left London in three small vessels. They landed nearly five months later in Virginia and founded a settlement which they called Jamestown. In these two volumes Mr Barbour has collected all the known documents relating to the Jamestown voyage during the life of the original charter. He has annotated them and translated those written in languages other than English. In his introduction he reviews the early sources, in particular books about the early history of the colony written by emigrants. This collection gives a graphic and fascinating contemporary picture of the first few years of the colony out of which the United States was destined to grow. [Click here to Order](#)

Jean Martin Charcot (1825 -1893) studied chronic diseases and afflictions of the aged, but found himself spending more and more time exploring diseases of the nervous system. Charcot's work has been immortalized eponymically through, among others, amyotrophic lateral sclerosis (Charcot's disease), tabetic arthropathy (Charcot's joints), cerebral artery aneurysm (aneurysm of Charcot), and progressive muscular atrophy (Charcot-Marie-Tooth disease). Freud grouped Charcot among "the great"est of physicians and a man whose common sense is of the order of genius". From 1872 to 1873 Charcot published lecons sur les maladies du systeme nerveux faits a la Salpetriere, his lectires given at the Salpetriere". The work was translated into English as the three-volume Lectures On The Diseases Of The Nervous System by the New Sydenham Society from 1877 to 1889. These three volumes offered here are the Special privately printed facsimile edition of that work. Limited and numbered edition of 1000 copies, this set being numbered 356. [Click here to Order](#)

The book traces the lives and experiences of the specially selected 308 convicts transported in H.M.S. Calcutta on arriving in Port Phillip in 1803. Several unforeseen circumstances caused the convicts to be moved to the Derwent where they began the settlement which became Hobart. The fates of these convicts were fascinatingly diverse. Some, when free, returned to their homeland, while others settled in Sydney or took to the high seas as traders, sealers, or pirates. Others became bushrangers, secondary offenders or succumbed to the grog and lost their land grants. But most prospered and many became more successful than the free settlers they had been sent to serve. [Click here to Order](#)
